DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, Claims 1-8 and 15-20, in the reply filed on July 21, 2006, is acknowledged.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-8 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for semi fuel electrochemical cells used for undersea vehicle propulsion, does not reasonably provide enablement for a generic system, as claimed. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims.

4. Claims 1-8 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for catholyte particles and an encapsulating species to be dissolved upon contact of a hydrolyzing liquid, does not reasonably provide enablement for a hydrolyzing liquid. The specification does not enable any person

Art Unit: 1745

skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims.

5. It is unclear to the examiner what the hydrolyzing liquid is. Examiner is unsure as to how the reaction rate of the catholyte particles and encapsulating species with the hydrolyzing liquid would be controlled. Examiner also questions the manner in which dissipation of heat would be handled based upon the reaction of the catholyte particles, encapsulating species and hydrolyzing liquid.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-8 and 15-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear what is meant by "a controlled surface" in claim 1 as it applies to the instant invention.

8. Claims 1-8 and 15-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear, in claim 1, what a "hydrolyzing liquid" is as it pertains to the instant invention.

Art Unit: 1745

9. Regarding Claim 7, the word "means" is preceded by the word(s) "for recirculating and cooling of said hydrolyzing liquid" in an attempt to use a "means" clause to recite a claim element as a means for performing a specified function. However, since no function is specified by the word(s) preceding "means," it is impossible to determine the equivalents of the element, as required by 35 U.S.C. 112, sixth paragraph. See *Ex parte Klumb*, 159 USPQ 694 (Bd. App. 1967).

10. Regarding Claim 8, the word "means" is preceded by the word(s) "for introducing seawater to said recirculating means" in an attempt to use a "means" clause to recite a claim element as a means for performing a specified function. However, since no function is specified by the word(s) preceding "means," it is impossible to determine the equivalents of the element, as required by 35 U.S.C. 112, sixth paragraph. See *Ex parte Klumb*, 159 USPQ 694 (Bd. App. 1967).
